

Dialysis Indications AEIOU

Emergency renal replacement triggers

Renal	PHYSICIAN REFERENCE
-------	---------------------

AEIOU

- Acidosis refractory/severe; Electrolyte disturbance (especially refractory hyperkalemia); Intoxications amenable to dialysis; Overload refractory with pulmonary edema; Uremic complications.

Important

- Do not start dialysis based on creatinine alone; integrate symptoms, trajectory and reversibility.

Clinical safety note

Use this as a memory aid, not a prescription. Verify current guidelines, local protocols, contraindications, renal/hepatic dosing, pregnancy status, interactions and patient-specific factors before treatment.
